# Forget about putting on the duvet cover

/ / \

## Our easy patented system

---

Forget about putting on the duvet cover.  
In fact, **don't put it on at all!**

Forget about making the bed because  
**it will never get unmade!**

And if that's not enough, don't even think about **Ironing!** The t-shirt single jersey fabric doesn't wrinkle - **from the washing machine to the dryer and from the dryer to the bed!**

What's more, the 100% soft cotton fabric has thermal properties. **It's cool in summer and warm in winter.**

# How do you make a Bekume bed?

— Step 1 —

**Put the fitted sheet onto the bed.** Because it's made of t-shirt single jersey fabric it fits well and is always wrinkle-free.

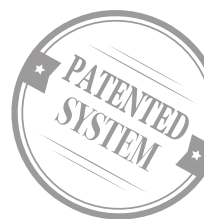

— Step 2 — **Put on the top sheet** with the fitted lower corners. The bed won't get unmade no matter how much the child moves around.

— Step 3 —

**Put on the quilted bedspread,** securing it with the tie underneath the sheet border.

\* You won't need a separate duvet as the bedspread is quilted.

# BE+KUME

*Home textiles with environmentally responsible production  
since we began in 2014.*

*“Transform your time of rest into a conscientious  
privilege without harming our planet.”*

High quality combed cotton thread is the flagship fabric of our brand. We are a home textile company that manufactures products conscientiously.

Our products are made in our own workshops in Barcelona, and we also work with local suppliers with OEKO-TEX® quality certificates.

Sustainable production and environmentally-friendly fiber treatments are the core values of our brand.

The result is natural fabrics which are resistant, breathable, and risk-free for the health of people as well as the health of the planet.
